

# **Where the Rainbow Begins**

## **By Daniel Varona**

She's a star  
Not for cardinal directions  
She's the one  
That'll take you to a different dimension

March to a higher universe  
Hike to the end of the world  
Dive to the bottom of the pool  
She's the star  
That'll take you to a different dimension

The angels left  
And so did everyone else  
The edge of the world begs,  
It cries for a new direction  
Perhaps a different dimension?

The city that started it all  
The home to a million worlds  
This is where the rainbow begins  
And where animosity subsides

Praying for Justice  
The City of Angels knows  
She's the one  
She's a star
